

Introducing the new Zippy rolling tarp system

From the makers of the Quick Draw Tarpaulin System

Redefining cargo protection with unmatched innovation and durability.

Explore its key features:

- Lightest tarp system on the market, enhancing efficiency and ease of use.
- Patented Quick-lock technology for quick and neat tensioning without the need for heavy ratchet posts.
- Military-grade stainless steel wheel bearings.
- Modular design enables fast and economical repairs.
- Pairs seamlessly with Demonte built truck Platforms.
- Zippy Tarps Systems come with a one-year warranty covering parts and manufacturing.

When considering the many requirements of today's freight covering options, dependability and quality are a must for trucking companies that are looking to compete for the most lucrative flatbed contracts.

The new Zippy Tarp System offers the following features:

- All aluminum carriers.
- New military grade stainless steel sealed bearing wheels.
- New patented track design.
- 3 options for opening the headboard, Air Release, Ratchet Style, and Manual Operation.
- Access door is available with or without bottom door Sill.
- State of the art laser graphics are available.
- Stainless steel headboard wrap is available.
- Many external and internal lighting configurations are available.
- 2 options available to tension the rear of the tarp system; Zippy-Lock (patent pending), Rear
- Triangular Brace.
- The New "My Step" (Patent Pending) is a fold away rear apron access module, that allows safe travel going up and down from the rear of the cargo area.
- The Zippy Tarp also pairs perfectly to Demonte Platform decks, often used in the Tool and Die industry.
